

## Collegiate Skating

### Calling All College Skaters!

Whether your greatest skating accomplishment is a swizzle or a double axel, going to college doesn't mean you have to put your skating on hold. Grab your friends, have some fun and stay fit while you continue to enjoy the sport you love.

If your school doesn't have an ISI Collegiate Skating Team, it's easier than ever to start one now! After the simple Collegiate Team Registration form is completed by your school and approved by ISI, you can represent your school in any and all ISI competition events throughout the academic year.

Download the [Collegiate Team Registration Form](#).

All team members must be a current Individual Member of the ISI. [Join or renew](#) your membership now.

There are many different test levels for collegiate skaters of all ages and skating ability. See the [ISI Test Level Requirements](#) list.

There are many competition events to enter. The Open Freestyle events are a great new freestyle program option without required maneuvers. USFS skaters can easily crossover to the Open Freestyle events. In some cases, only one equivalent level must be registered.

Of course, don't forget about all the other event options such as Artistic, Spotlight, Footwork, Rhythmic and Interpretive. It's also great fun to join an Ensemble, Production or Synchronized skating team with your college friends. The new Collegiate age division for synchronized teams only requires the majority of skaters be between the ages of 18-25 and be affiliated with your college or university.

Refer to the list of the [National Event Descriptions](#).

*You've already got a team together and you need a place to compete?* Then check-out these links for [ISI Endorsed Competitions](#) and [ISI National Competitions](#).

Several new regional collegiate competitions are being planned for the upcoming season. These events will offer all of the opportunities, rewards and – most of all – **FUN** that our ISI skaters have come to know and love.

For more information on ways to get your college skating team up and running or if you are interested in hosting a regional collegiate event, please contact:
